Research and innovation are key factors for changes towards a more sustainable economy able to create new job opportunities, to fuel productivity and wealth. Countries investing in research and innovation are more resilient to an economic crisis, react promptly to the great societal challenges of our time, and perform better in the strong global competition that continuously shapes economies and societies. The purpose of RTSI forum is to promote and to strengthen partnerships and cooperation between academia and industry; to discuss interdisciplinary ideas and to promote cross-fertilizing cooperation among researchers working in different research areas; to increase the public understanding and awareness of how engineering and technology can positively affect people quality of life; to promote discussion between the research community and related government bodies about effective and successful research policies; to disseminate recent advancements, research/technology solutions, and novel applications.
