

## **SESSION 2.1 - COMPUTER VISION**

### **Invited speech - COMPUTER VISION IN EMBEDDED DEVICES**

An overview of the evolution of embedded devices dedicated to image processing and computer vision for consumer devices will be presented during this talk. The speaker will highlight the challenges a semiconductor company faces in this domain, how it interacts with the research communities and with customers in the definition of a product roadmap. Finally, an overview on occurring technology trends and new opportunities for industries and research institutions will be outlined.
